

Creating Slides in PowerPoint to use in Photo Story

1. Open PowerPoint
2. Create a title slide with text or Word Art or other slides with text and/or clipart/Word Art.

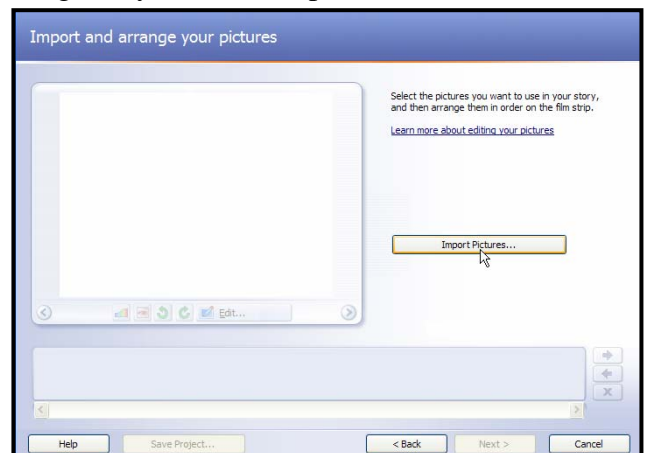

3. Click on File from the Menu bar and select **Save As...**

4. In the **Save as Type** box choose a picture format (GIF or JPEG should be fine).

5. Click the Save button (make sure to save in your folder or somewhere you can find it). You will be given a choice of exporting every slide into a picture format or just the current slide.

6. Finally, in Photo Story, use the **Import Pictures** button to bring the PPT pictures you created into your Photo Story project.
